Vol. 19. No. 50.

Irma, Alberta, Friday, June 14th, 1935.

\$2.00 per year in advance; 5c per copy

## GLENDALE CLUB

The above club met at the home of Mrs. J. Lambert on Wednesday, June 5th, with a large number of members present. Visitors were Miss Doretha Bates, Miss Annie Ford and Mrs. Rome. With Mrs. Whiteley in the chair the meeting opened with a song—"When you and I were young, Maggie." The roll call was answered by what we like best about Alberta. A demonstration on hairpin work by Miss Bates was greatly appreciated. Songs were given by Irene Lambert, Mrs. Whiteley and Mrs. Lambert. Recitations by Miss Doretha Dalton.

Mrs. Goodwin and Harry Goodwin, and a reading by Mrs. Hudson was well received. A contest and raffle were won by Mrs. New and Mrs. Myers, and the singing of God Save the King brought a pleasant afternoon to a close. The hostess, Mrs. Lambert, served a most delicious lunch.

The next meeting will be held at the home of Mrs. New on the afternoon of July 3rd, when Mrs. Whiteley will give a demonstration on making roses.

Mrs. and Mrs. J. Dunbar and Mr. Wm. Dalton visited at the New home on Sunday.

Mrs. G. M. Whiteley and Mr. and Mrs. Goodwin were visitors at the home of Mr. and Mrs. B. Craig on Sunday.

Miss Lucy Thompson has returned home from the Wainwright hospital and is improving nicely.

Breaking is the order of the day in the Avonlea district. Mr. Lukins has finished a 12-acre piece for Mr. Goodwin. Mr. Taylor is breaking a large field for Mr. Whiteley, while Mr. S. M. New has finished 40 acres on his own place, and Mr. Simon Delke is breaking for Mr. Wm. Johnson.

It is reported that Mr. Wm. Lawson is going in for chicken raising. We join in wishing him every success.

## NEWS ITEMS FROM JARROW

Mr. Ed. Peet received the sad news recently of the death of his father in Hamilton, Ont. Mr. Peet left immediately to attend the funeral.

Mrs. Leslie Moose was operated on in the Viking hospital last week for appendicitis. She is getting along well.

Don't forget the date of the play, "The Path Across the Hill," next Saturday, June 15, at 8.30 p.m.

Joan Murry of Kinsella is visiting with her aunt, Mrs. S. Murry, north of Jarrow.

The farmers north of town are anticipating that a mail route will be running in that district in the not distant future.

A new restaurant will be opened in Jarrow soon, the proprietor to be a Chinaman from Viking. Are "boom days" is sight for Jarrow again?

Your last chance to see the play, "The Path Across the Hill," Saturday, June 15th.

The Coe family have moved from the Corbett building to Mr. Morgan's residence.

Mr. and Mrs. Wm. Boyd Sr. of Holden were Sunday visitors in Jarrow.

Mrs. Wm. Boyd Jr. was taken to the Viking hospital and expects to undergo an operation for appendicitis on Tuesday, June 11th. We wish her a speedy recovery.

Miss Ruby Carter is in the Viking hospital having had an operation for tonsil trouble.

Mr. E. J. Kelly is in the Viking hospital with throat trouble.

## United Church Notes

On Sunday, June 16th, the country services will be at Paschenale and Roseberry. The Roseberry friends will note that the services will be continued until further notice.

The country services for June 23rd will be at Albert and Alma Mater. This will be Rev. Geeson's farewell sermon for these appointments. The usual evening service will be held in Irma at 8 p.m.

## SPORT PEEPS

The sport of pigeon racing is growing. Edmonton enthusiasts have found Viking a desirable point for the release of their birds. This is in part due to the suitable distance from the city, and also to the service rendered by J. L. Dodds, co-operating as to time, etc.

Over at Bournemouth in England these pigeon races have reached astounding figures. As many as 40,000 birds were released the other day, at one time. Imagine the burden imposed upon the railway officials, handling some 15,000 baskets with a weight of twenty tons. There was plenty of confusion among the birds, and they did not all get to their proper home. The best birds made 100 miles in 120 minutes, a speed of 50 miles an hour.

When Austin played Perry in a recent tournament in England, he extended him to the limit for four sets. But in the fifth set Austin did not win one game, due to lacing his shoe too tightly, causing cramps through this restricting circulation.

During the reign of our present king, one of the greatest changes has been effected in women's clothes for tennis. Back in 1911, how any woman managed to dash about the court in a skirt as big as a tent, is beyond the understanding of a mere man. Pictures prove the fact was accomplished. Today, the female costume is in accord with this strenuous game. Sometimes in fact the abbreviation of garment appears somewhat startling in any case it is a big improvement over the style of the coronation period.

Germany has outstanding tennis players at present in Baron von Cramm and Madame Sperling. The latter won the French title, while von Cramm put up strong opposition to Fred Perry in the finals of the singles for men.

The departure of Babe Ruth from the Boston club is a blotch on the career of the most glamorous star of baseball. The squire placed Ruth in a position similar to Napoleon when after a great epoch of history-making he suffered the ignominy of St. Helena. But Ruth must blame himself for the result. Years ago he made a reputation for lack of self-control.

## NOTES OF INTEREST OF BUSY KINSELLA

Mrs. M. Garvie was visiting in Wainwright Monday.

Miss Ella Carmac is home for holidays from Edmonton.

Mr. Lee is in Viking hospital and reported to be doing nicely.

Miss Jean Bawden was visiting at the home of Mrs. Nease on Monday.

Miss Sterling spent the week-end in Holden.

O. Simpson spent the week-end at Galahad.

The new school house is well under way, and quite an improvement over the old one.

Mrs. Wachter was taken to the University hospital in Edmonton on Thursday, where she will undergo an operation as soon as she is strong enough.

Mr. and Mrs. P. J. Wangness went to Lamont on Tuesday to visit Mrs. J. Wangness who is in hospital there.

The ladies' aid meets at the home of Mrs. Smogard on Thursday.

Mr. and Mrs. W. W. Kerns were visiting in Holden, Edmonton and Gibbins from Wednesday until Saturday.

The Jarrow play will be put on in the Rodino hall on Monday, June 17. This play was in Kinsella some time ago and is well worth seeing. It has a good story and the cast has been well chosen. There will be lots of laughs for all. The darkie bride is so happy, she will make you all happy.

Mr. Claud Wachter spent last week at home, and has returned to work at Jarrow.

## Obituary

MRS. JACOBINA BERRETH

The late Mrs. Jacobina Berreth was born December 23, 1855, in Russia, of German parents. She has travelled extensively in Europe and Asia. She was married at the age of 20 to Andrew Quast, and came to America the next year, settling in South Dakota. Six children were born of the marriage, three daughters who are now living in the Dakotas; two sons now living, one in North Dakota, one in Saskatchewan. A third son predeceased his mother on February 17, 1935. Her husband died in 1889.

The deceased re-married in 1891 to Frederick Berreth. Three children were born of the marriage, a daughter who now lives in Calgary and two sons living at Hardisty.

The late Mrs. Berreth emigrated to Canada in 1908 and homesteaded in the Irma district, where she spent the remainder of her life. Her husband died in 1910.

During life she was a strong church worker, belonging to the Congregational church.

She enjoyed the best of health until December, 1928, when she suffered a paralytic stroke, from which she practically recovered, only to suffer another stroke in May, 1929, from which she has been an invalid ever since.

Always bright and cheerful, though unable to speak due to paralysis, she was in good health until about two weeks before her death. Taken very ill Sunday morning, she passed to rest Monday morning at 5.45 a.m., in St. Ann's hospital, Hardisty, at the age of 79 years, six months, and 19 days. She leaves to mourn her loss Mrs. Mary Edelman; Mrs. F. J. Peitz; Mr. G. Quast; Mrs. P. Oxner; Mr. A. Quast; Mrs. C. G. Turner; Mr. T. H. Berreth and Mr. R. S. Berreth.

The funeral service was held in the United church, Irma, on Wednesday afternoon, June 12th, at which a large crowd of friends gathered to pay their last respects. Interment took place in the Irma cemetery. The services were conducted by Rev. R. W. Griffith, of Jarrow. The following were pall-bearers: Messrs. J. A. McDonald, Henry and Robert Kasten, H. Christenson, Roy Bronson and Olaf Larson.

## THE WONDER WEEDER

Is all the name implies, now selling from coast to coast, fine for lady gardeners.

PRICE 85c and \$1.00. Get your plot shares from me and save money.

V. HUTCHINSON  
Renfrew Dealer, Irma

## Wax Plucking of Poultry

Both the material and the method for the wax plucking of poultry have now reached the stage of commercial application, and demonstrations will continue to be given at strategic points throughout the Dominion as arranged. This development is the successful result of the research work carried out during the past winter by the National Research Council of Canada in conjunction with the Live Stock Branch of the Dominion Department of Agriculture. Their allied efforts evolve a suitable wax and an efficient method of plucking have proved so satisfactory in actual practice that considerable possibilities both for commercial plants and on the farm have been made available. The system, in brief, consists of immersing the bird in liquid wax, after the rough feathers have been removed. The coating is allowed to harden and when removed takes with it residual and pin feathers, hairs and scales, leaving a bird with a clean and attractive finish. For the time being the wax will be prepared in limited quantities by the National Research Council, Ottawa. Particulars concerning the procuring of the wax may be obtained from the Council, or from the Live Stock Branch, Dominion Department of Agriculture, Ottawa.

## NOTICE

It has been brought to the attention of the Council of the Municipal District of Kinsella, No. 424, that certain of the Ratepayers are allowing scrub bulls and scrub stallions to run at large in this Municipality. This is against the law and the Council have instructed me to put this notice in the paper and inform those guilty of this practice that in future any person who allows this to happen will be severely dealt with.

B. H. GREEN, Sec.-Treas.,  
M. D. of Kinsella, No. 424.

## Shipping Hogs

Irma, Tuesday, June 25th  
Jarrow, Wed., June 26th  
Hogs Bought Any Day at Irma

Hogs to be in yards at Jarrow not later than 2 o'clock day of shipment.

**The Higher Yields From Small Plots**  
Scientific agriculturalists at Governmental Institutions have often noted the superior yields that come from small plots managed by hand, as compared with the lesser yields obtained from large fields seeded and cultivated with machinery. Investigations that have been made, particularly at the Dominion Experimental Farm, Swift Current, have revealed that the differences in yields are mainly due to the fact that on small plots weeds are usually all removed by hand, whereas on large fields the implements permit a certain percentage of the weeds to thrive. It is evident, therefore, that much valuable moisture will be saved if weeds are well kept down on summerfallow.

## A LITTLE COMPANY GROWN BIG

IMPERIAL OIL was a little Company in 1880. There was then only a handful of employees. A dozen or so products were the Company's stock in trade.

Today nearly 18,000 Canadian men and women are engaged in making and selling 714 different Imperial Oil Products. So, counting their families, there are about 90,000 people directly dependent for livelihood on this Company and its operations. 90,000 is a lot of Canadians.

Imperial Oil's growth depended upon more than growth in population and demand. Fair dealing, honest value and the ability to meet new needs with

new products and new services all played their part. Of course, a loyal, capable staff was indispensable. Such a staff was built up by fair and considerate treatment. Good wages, sickness and death benefits, retirement pensions, group insurance, industrial councils—these are some of the measures by which the Company has recognized its responsibility to the men and women in its employ.

These men and women have recognized in turn their responsibility to the Company. By loyal, whole-hearted service they have helped it to make better products at lower cost and thus become "a big company."

### Child Labor

In Canada, and in the western provinces particularly, as in many other agricultural countries, laws are enacted and regulations made under those laws from the operation of which the industry of agriculture and those engaged in it are exempted. For example, legislation regulating hours of labor in industry cannot well be made applicable to agriculture, although there are some idealists who, shutting their eyes to practical conditions, urge that such laws could and should be applied and enforced on the farms as well as in the factories. Workmen's Compensation Acts, passed for the protection of urban workers, are in many respects not applicable throughout the rural sections.

As we proceed to write this article, daily newspapers lie on the desk telling of the complete wreckage of the N.R.A. codes governing industry and business generally throughout the United States as a result of a decision of the Supreme Court declaring such legislation unconstitutional, being beyond the powers of Congress to enact inasmuch as it encroaches upon and usurps the constitutional rights and powers of the individual States of the Union.

Whatever varying and opposing opinions people may entertain regarding the Roosevelt experiment as a whole, there has been general approval of the provisions in the N.R.A. codes prohibiting child labor in shops and factories. It has been estimated that an army of at least 100,000 children marched out of shops and factories with the establishment of these codes, and there was a widespread belief that thereby the increasing problem of child labor had been solved for the time being at least. Now the protection afforded these children has been destroyed, although it may be hoped that those in control of industry will not revert to the employment of child labor.

Unfortunately, industry accounted for only a small proportion of the 700,000 children under 16 who were listed as working at the time the U.S. census of 1930 was taken. By far the greatest number, almost half a million, were found in the ranks of agriculture, to which the codes did not apply. It has been pointed out that the cotton fields, tobacco fields, truck gardens, beet fields, onion fields, potato fields, cranberry bogs, berry farms, hop fields and orchards with each returning season make their demands upon the nation's children, and that to hundreds of thousands of boys and girls, many as young as six, the coming of the end of school sessions means not the beginning of a holiday time of freedom and play but a period of toil that often starts at sunrise and ends at sundown.

Except for the fact that these children work in the open air, their lot is in many respects a harder one than those children in shops and factories, and one can appreciate the yearning expressed by one 12-year-old boy for the day when he will be old enough to get a job in a mill and work only eight hours a day.

The situation in Canada is, of course, not comparable to that in the United States, or in other lands where congested populations eke out an existence and intensive tillage of the land by the whole family is necessary. Furthermore, in Canada our standard of living and of education is much higher than in most countries, and in the cotton, tobacco and other fields of the southern States. Canadian parents, as a rule, are more desirous of giving their children the highest possible education than they are to work them as farm hands and profit-making laborers.

But inasmuch as many of our laws which are designed to protect urban workers and which prohibit child labor are not applicable to agriculture, a greater responsibility is thrown upon parents engaged in agriculture to protect their children and not lose sight of the humanities, the frailties, the limited powers of endurance of young boys and girls, and to remember that their proper physical development and mental outlook on life necessitate hours of play and recreation; that their bodies and minds will be stunted by long hours of work and no play. It is still true that all work and no play makes Jack a dull boy.

This is not to say that farm boys and girls should not be required to assist in the work of the farm, they should. Doing chores is part of their education and preparation for life, and it would be both foolish and wrong to do for them what they should do for themselves, or permit the development of habits of idleness or shiftlessness. But inasmuch as definite laws for their protection from what may be termed exploitation do not apply in rural as in urban life, it is all the more necessary that rural people guard against selfishness and thoughtlessness on their own part in the matter of overworking children on the farm.

Canada stands high in the matter of child labor. It is a matter of national pride that this is so. We stand high in the matter of education, and our school attendance laws afford the greatest legal protection against the exploitation of child labor, both in city and country. It should be the aim of the Canadian people as individual citizens to raise the standard of child life progressively higher as the years go by, and entirely eliminate the blot of commercialized child labor from this fair Dominion.

Belgium is the most densely populated country in the world, having nearly 8,000,000 residents occupying an area of 11,782 square miles.

**NATURE'S MINERAL SALTS**

Chosen the present—purifies the blood, builds up the system, relieves of constipation, indigestion, rheumatism, kidney and liver. As all Druggists—59c.

**SASKASAL**

**Classed As Luxuries**

Baths and perambulators are to be taxed as luxury articles in Yugoslavia, according to an announcement by the Ministry of Finance. Other articles included in this order are gramophones and records, flowers and sweets.

If you want to be popular it's a good idea to learn the art of remembering what to forget.

### Live "Dragons" At Zoo

Habitants Of Dutch East Indies Taken To London

There were live dragons in King George's Silver Jubilee celebrations, but they did not take part in the procession.

There was a pair of them and they were seen for the first time by the public at the zoo. Komodo dragon is their full name, though learned people speak of them as monitor lizards. They came from Komodo Island in the Dutch East Indies, whence they were brought by Lord Moyne, who has been there studying their habits in the wild state. Some of the animals in their native habitat are 12 feet long, and their nearly-related, extinct Australian species grew to 50 feet. And these it is that are supposed to have been the originals of the dragon legends throughout the world.

Seen travelling erect on their four legs—not crawling like the alligator—with their longish heads carried aloft and the tips of their long tails sweeping the earth, they are indeed capable of inspiring fright in the primitive mind.

The pair given to the zoo are the most interesting and valuable reptiles in this wonderful collection and some striking photographs of them in their native surroundings accompany the exhibits. They were kept in the zoo sanatorium for a few days so that the keepers might study their habits, and were then put on view for the first time on the King's Jubilee Day.

### A Magnificent Statue

Cleaning Revealed Effigy Of Black Prince Is Pure Gold

The Black Prince—or at least his statue—is no longer black. For centuries the statue over his tomb in Canterbury Cathedral has been as black as his name. It was never cleaned.

Then, about a month ago, it was centuries of grime and a coating of protective enamel were delicately removed under the direction of Professor W. W. Tristram.

A most beautifully wrought effigy in pure gold on a foundation of bronze was revealed. It is in almost perfect preservation and is one of the most wonderful examples of fourteenth-century craftsmanship in existence. The tomb was built 550 years ago.

"The most magnificent tomb in England," is Professor Tristram's description.

"We clean the cathedral regularly," the Dean of Canterbury said, "but for some reason, I really don't know why, it never occurred to anybody to clean the Black Prince. Now that we have done so everybody is delighted, and we are having a great many visitors." The tomb is one of the most lovely monuments in the world. Its value is incalculable."

### Gasoline Discovered

Unable To Explain Gasoline Reservoir Near Earth's Surface

A huge underground lake of pure gasoline was discovered in the harbor district near Wilmington, California, causing hundreds of persons to stampede to the scene.

Shallow wells, most of them dug to a depth of only two feet, were producing from four to six gallons of gasoline an hour.

The scene, a low area about two blocks square, was dotted with hundreds of gasoline "prospectors," some of whom brought hand pumps to speed up production. Motorists filled the tanks of their automobiles and trucks.

Fire Chief Ralph Scott, at a loss to account for the gasoline reservoir beneath the earth's surface, said, however, it probably came from a leak many years ago in a pipe line leading from a refinery to a harbor terminal.

### More Counterfeiting

Advances Made In Science Makes Danger More Threatening

The United States secret service conceded advances in science have made counterfeiting a more threatening racket than ever before. Statistics prepared by Chief William H. Moran showed there were 999 arrests and 668 convictions for this offense in 1930, while in 1934 there were 2,751 arrests and 1,603 convictions. Officials declared the perfection of photo engraving process has enabled the underworld to turn out illegitimate currency in a much more efficient manner.

Construction of the Canton-Hankow railway in China is progressing so rapidly that the line may be in operation this year.

### ALL FOOD MADE HER ILL

Caused by Acidity—Corrected by Kruschen

"It is only fair to pass these facts on," writes a nurse. "I was suffering from over-acidity and flatulence to such an extent that I was completely ill. I couldn't take food. When I actually forced myself to take something, I would be wretchedly ill. I have now taken Kruschen for 12 months, and I have no doubt that it has righted my digestive system. I am now quite fit and able to work with vigor again."—Nurse E. S.

Indigestion is caused by a failure in the flow of the gastric or digestive juices. As a result, your food, instead of being assimilated by your system, simply collects and ferments inside you, producing harmful acid poisons. The immediate effect of the six mineral salts in Kruschen is to promote the healthy flow of the vital juices of the body. As you continue with the "little daily dose," it ensures the regular and complete elimination of all waste matter every day. And that means a complete end to indigestion.

### A Remarkable Personality

British Empire Suffers Great Loss In The Death Of Col. Lawrence

The death of Col. T. E. Lawrence—or, to be more correct, Col. T. E. Shaw, since evidently he had changed his name by legal process of re-naming—loses the British Empire one of the most colorful figures it has yielded. "Lawrence of Arabia" was more than colorful; he was almost a mythical god. There was even a suggestion of a messianic strain about the man, so remarkable were his powers of leadership and influence.

Lawrence, only 46 at death, and a graduate of Oxford, unquestionably helped to the winning of the World War on its Eastern front. He it was who, by sheer personal influence, quelled friction among the Arabs and roused and marshalled them against the Turks. He helped materially toward Allenby's victories in Palestine. He was a strange combination—scholar, soldier, mystic and diplomat. He was a peculiar yet remarkably effective force projected into a romantic and difficult setting. Lawrence was as unobtrusive as he was effective. He was a poor publicity man so far as self was concerned. Unlike the Pharisees of an earlier day in the life of the East, he sought no greetings in the market place or chief seats in the temple and at feasts.—Regina Leader.

### Lac Seul Project

Rising Of Water Causes Damage To C.N.R. Road Bed

Rising of the waters of Lac Seul in northwestern Ontario has caused damage to the road bed of the Canadian National Railways, Hon. Hugh Stewart, minister of public works, told the House of Commons, explaining a vote of \$175,000 in the public works bill for Lac Seul protection works. The lake is being raised under an agreement between the Dominion and the provinces of Ontario and Manitoba in connection with power developments.

The money will be used for rip-rapping along the railway and contributions to the cost of the work will be sought from both Ontario and Manitoba.

### In Memory Of Livingstone

Statue Of Famous Explorer Erected In South Africa

A famous explorer's memory has been perpetuated by a memorial erected almost at the edge of the Devil's Cataract of the Victoria Falls in South Africa, where their road is always to be heard and the spray of tumbling waters ever visible. The memorial is in the form of a statue of Dr. David Livingstone, and was unveiled by the Hon. H. U. Moffatt, a former Premier of Southern Rhodesia, and himself a nephew of the famous explorer and missionary. The memorial to the famous Scot and discoverer of the Falls has been provided by the Federation of Caledonia Societies of South Africa.

### Economical Air Transport

Aerial Train Can Drop Gliders At Different Points

A Soviet aerial train took off in mail week from Moscow on an experimental flight and landed four and a half hours later at Kharkov, about 400 miles away. It consisted of one regular aeroplane towing three gliders each manned by a pilot. The idea of such aerial trains is that individual gliders can drop off at different points without the main aeroplane landing, thus providing swift economic air transport.

### Russia Making Rubber

Oil Waste And Calcium Used In New Process

New processes for making synthetic rubber out of the waste products of oil refineries and from calcium carbide are being tried out in Russia.

Heads of the Soviet industrial syndicates expect shortly to be manufacturing the product at the rate of 20,000 tons a year.

This will have far-reaching effects on the rubber-growing plantations of the Far East, and will upset considerably the working of the Rubber Restriction Scheme, under which 30 per cent. of the trees are not being tapped so as to force up raw rubber prices.

The first factory for manufacturing rubber from oil waste is now being started in Moscow. The lessons learned there will be applied in the construction of the several large plants in the oil well districts.

About 35 pounds of rubber are produced from the waste products obtained from refining a ton of oil. In the past these products in many cases had to be wasted.

The other process, for manufacturing rubber from calcium carbide, is to be operated at Erivan in Armenia, where a factory is now being constructed. The process is the invention of a number of young Soviet scientists working in Leningrad.

Water is added to the calcium carbide, forming acetylene, the gas of which is often used for lighting. Then, after a series of chemical reactions, a substance called chloroprene is produced and thus ultimately becomes rubber.

The rubber is said to have all the working and wearing qualities of real rubber, and to be very much cheaper.

### Best Aid To Sleep

Formula For The Perfect Night-Cap Has Been Evolved

It is generally recognized that the best aid to sleep is warm milk; and that the main use of all night-caps is not as a soporific but as a means of removing from hot milk the unpalatable taste which prevents so many people from drinking it regularly at night. Since tea is the cheapest beverage in the world, and the one that is in every family cupboard, its use in this connection is highly desirable. A formula for the perfect milk night-cap has now been evolved. Tea should be made in the usual way, which means that one teaspoonful of leaf should be allowed for each person and one for the pot. The pot should only be filled half way, and when pouring out after the usual four to five minutes infusion the cups should be only half filled. They should then be filled up with hot milk, but not with boiled milk.

Twenty-two million cups of tea are drunk in Canada every day or over eight billion cups of tea a year. The tea industry is therefore one of the farmer's greatest allies, for investigation has shown that the number of people who drink tea without milk is almost negligible.

### Welcome Heavy Rain

Australians Glad To See "Knock 'Em Down" Variety

Darwin, Northern Australia, recently welcomed the annual "knock 'em down" rains.

Although this aboriginal description of the torrential downpours, which herald the end of the wet season, sounds grim, the rains are very welcome throughout the Northern Territory. These heavy downpours towards the end of the monsoon period level the long grass which earlier falls have caused to grow to a height of six to ten feet.

In the three months following Christmas, about 40 inches of rain fell in Darwin, and the grass bordering the roads was so high that a man driving along the road could not see a friend walking along the footpath. In low-lying sections of the city grass grew in a tangled mass ten feet high. That is why "knock 'em down" rains are welcome.

### A Great Salesman

The greatest salesman of the Empire is the Prince of Wales! On a hot day, once, according to Lord Dudley, he talked in Rio de Janeiro for more than an hour. As a result British iron and steel industries received an order for a \$15,000,000 contract. Lord Dudley told the story at a meeting of the Iron and Steel Federation of which he is president.

A blind philanthropist has given \$200,000 for investigations in Scotland on the origin and causes of blindness, working towards prevention and cure.

### 'Tis Jolly To be Wise!

There is a lot more pleasure in rolling a cigarette with Ogden's Fine Cut—a tobacco you KNOW will pass your own tests for smoothness, coolness and fragrance.

Smart "roll-your-owners" everywhere are "wise" to Ogden's. They'll tell you that Ogden's Fine Cut and "Chanteclair" or "Vogue" papers make the right combination for rolling smooth, satisfying cigarettes.

Your Pipe Knows Ogden's Cut Plug

### An Old Organization

First Holstein Society Started In Germany In 1872

Cattle resembling the present-day Holstein have been bred for centuries along the south shore of the North Sea, from Holland over to Denmark. Some of the early importations into the United States came from the German province of Holstein, just south of Denmark and a breed society of that name was started in 1872. But most of the early importations came from Friesland and the country in Holland bordering on the Zuider Zee and a Dutch-Friesian Society was started in the States in 1879. These two merged in 1885 with the name of the Holstein-Friesian Association of America. Although the most of the foundation stock of the breed came from Friesland the name has stuck, the Holstein-Friesian Association of Canada having been formed in 1891.

### New Type Of Tent

Framework Of Airtight Cloth Tubes Has To Be Inflated

A pneumatic tent recently displayed in London must be pumped up. In place of the customary centre pole and guy ropes, the shelter has a framework of airtight cloth tubes that may be blown up with an ordinary motor-car pump when the camping site is reached. When it is erected, the tent is six feet high and seven feet square. Deflated, it fits in a suitcase.

### KIDNEY TROUBLE

will result in headaches, backaches, broken sleep, and a tired, listless feeling during the day. At the first indication of any of these symptoms, take GIN Pills for prompt, safe relief. You'll feel better, look better and sleep sounder. Remember the name

**GIN PILLS**  
FOR THE KIDNEYS

## MISS ALADDIN

—By—  
Christine Whiting Farmer  
Author of  
"One Wide River To Cross"  
"The Unknown Port," etc.

## SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

## Now Go On With The Story

## CHAPTER III.—Continued

There were also plans to make for Aunt Judy, who was to sail in a fortnight. The air was filled with a subtle confusion and unrest. And then one late afternoon, returning from a tea to which her mother had urged the girl to go, Nancy spied a telegram on the hall table. It was addressed to Jack, but she grasped the envelope eagerly, her heart pounding as she tore it open. A dim hope that Cousin Columbine would wet-blanket the whole idea, except through her, but the message, eccentric and to the point, read briefly:

YOUR LETTER, SHOWS YOU TO BE A TRUE NELSON STOP GET JOB ON RANCH THREE MILES FROM HERE STOP SORRY TO HEAR OF YOUR FATHER'S REVERSAL STOP IF NOTIFIED WILL SEND CHECK TO COVER EXPENSE OF TRIP FOR BOTH OF YOU STOP ADVISE COME AS SOON AS POSSIBLE—COLUMBINE NELSON.

Nancy read this twice, her hands gripping the paper tensely. She was still staring at what seemed an irrevocable sentence at hard labor, when her father entered the room so quietly that she had no chance to conceal the tell-tale yellow message. He asked, a touch of alarm in his voice: "What's happened?"

She glanced up, forcing a smile of reassurance. "Nothing to worry about. It's a telegram for Jack. No bad news, Daddy."

"Let's see, daughter." He stretched out a hand, but Nancy thrust the paper into her coat pocket.

"No," she said, "you'll have to wait till Jack comes home and tells you. He took Aunt Judy over to the Spears' on some last errand."

She moved away, his eyes following her, puzzled. "But who's it from, Nancy?" The girl laughed.

"You're just as curious as an old woman, Dad; but I promised not to tell, and I'm not going to. You won't have long to wait. It's almost dinner time. Here's Aunt Louise."

She darted off before he could question any further, but as she reached her room a voice recalled her, and Jack, who had come in close on his aunt's heels, was up the stairs.

"Hi there! Dad says I've got a telegram. What luck?" Nancy held it out, watching him read it. The boy drew a deep breath of relief.

"Good! That's settled then." "It's not if Dad objects, or—Mother."

She couldn't keep the shamed hope out of her voice, and catching its

## WHEN YOUR DAUGHTER COMES TO WOMANHOOD

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

Sold at all good drug stores.

Lydia E. Pinkham's Vegetable Compound

meaning Jack said scornfully: "Don't be a slacker, Sis. Come down and see how they all react. Every one's there, even the kiddie. We'll take a vote. Buck up, Nancy. It's a pity if you can't help out when all the rest of us are trying to."

That hurt. Nancy turned away to hide the tears which sprang into her eyes. A slacker! Well, she'd show him! If only she wasn't so beastly scared at the idea.

"Be down in a second," she said as her brother made an impatient gesture; and then added angrily: "And don't you call me any names before the others!"

"Oh, see here!" He followed her into the room, closing the door. "I didn't mean anything, Sis, honest. I was only afraid they'd see how much you hate to go, and put their feet down. Come on now. Let's get it over before dinner."

The family's rebellion was very nearly unanimous.

Said Dad: "If you must have jobs, both of you, surely we can find something nearer home."

Said Aunt Louise: "You're too young and impressionable, Jack, to spend six months or so in rough surroundings; and Nancy would die of boredom if of nothing worse. What put such a wild idea into your head?"

"He was only trying to help," defended Aunt Judy with her unswerving loyalty, "but Colorado is terribly far away, Jack. I'd worry my head off," while Phil, the ten-year-old, exclaimed excitedly: "Gee! folks, I'd like to be a cowboy! Just think of quitting school and staying outdoors all day!"

And strangely, this innocent remark of her younger son was what stopped the protest on Margaret Nelson's lips. In a flash she remembered that not many months ago the family doctor had said for Jack: "If that boy were mine I'd let him forgo school for a year or two and live outdoors. A job on a farm would be worth considerably more to him than a diploma."

Yet because Jack seemed reasonably well this good advice had not been taken very seriously. But now, looking up at the five-foot-eleven-inch, two-hundred-pound, those warning words came back, and to the complete surprise of everybody, Mother said: "It would be a splendid thing for Jack—an outdoor winter in a milder climate; but—"

"You're not implying," broke in her husband, "that you'd let those children go off there all by themselves?"

"Children!" This exasperated exclamation came from Jack. "I'll say if Nancy is old enough to be launched in society with a big splurge, she's old enough to be away from home for a few months—with a relative too. As for me, Dad, you bet I'll have to do a man's work or lose the job. Why, I'll be eighteen on—well, on my next birthday."

Since his previous birthday was only six weeks back, this brought a laugh. Then Aunt Judy said: "And don't does Nancy think of all these plans?"

The girl hesitated. All eyes had turned upon her; but glancing up she saw only her brother's, and responded gamely: "It would be something new, wouldn't it? And it couldn't be very much duller than Edgemere."

"But, Nancy!" protested her father in distress, "you'd be living with an old lady, one you've never seen and who we've reason to believe eccentric. And if she paid your fare you'd be in duty bound to stick it out a while, no matter what you found."

"But I'd be earning my living," she retorted, wondering why she was arguing on wrong side, and what had got into her. Why, in fact, didn't she tell them the whole truth—that she was frightened stiff at the prospect—would almost rather die than spend a winter with Cousin Columbine, but was ashamed to admit it before Jack?

"Well," declared Aunt Louise, "it's the most extraordinary plan I ever heard of. And from Nancy! As I said before, what put such an idea into your head?"

"Circumstances, of course," spoke up Aunt Judy. "They want to help

through the hard sledding; and I think they're splendid. But how could we let you go so far from home, dears? You might be sick."

There followed a silence before Mother said: "I'm not in favor of this move—yet; but I'll have to admit that according to Doctor Strong Jack's more likely to be sick if he stays in school." She went on to tell them of the doctor's chance remark, and added: "I thought at the time that he was over cautious, Jack seemed so well; but the boy has grown appallingly, and I dare say life in the open air would build him up if he didn't have to work too hard."

Aunt Judith sank back and stared at her sister.

"I'd never have expected that—from you, Margaret. But if you ask me, Nancy will expire of loneliness in about one month. What will she do with no young friends to run around with, and Jack three miles off on a ranch?"

The boy laughed. "You talk as if the population of Pine Ridge was made up of inhabitants over seventy, Aunt Judy. Didn't Cousin Columbine mention a postmaster's daughter? And of course there are others. Who knows but Nancy will find her—her affinity or whatever they call it, out in the big wild West?"

"Aunt Judy," sniffed Aunt Louise. "Where did you pick up that nonsense? And it's far more probable that what she'll find is a devastating attack of homesickness, young man."

"Well," Jack retorted, "that's nothing fatal."

"It might as well be," observed his father. "I remember spending a summer at my grandmother's farm when I was twelve. I expected a real lark, but—homesick! Well, I warn you kids that homesickness is no light matter."

"I s'pose you'll be riding horseback all day long," spoke up the little brother enviously. "I wouldn't think of being homesick if I had a horse, Daddy. Will you wear a four-gallon hat, Jack? And leather chaps with fringe all down your legs like they do in the movies? Gee! I wish I was going too!"

"We don't know yet whether anybody's going soon," returned his father. "Where's Cousin Columbine's letter, Margaret? Let's make sure what is expected of our Nancy."

There ensued a fruitless search for the long epistle; but Mother said: "I remember those duties pretty well, Jim. Nancy was to dust the mansion every morning, get supper Thursdays, sew, read the paper aloud, get to bed by nine-thirty—"

"And abstain from the boy-friend," chuckled Jack. "I admit that last is a big order—for Nancy."

"A lot you know if you think I'd run around with those country pumpkins," replied his sister. "Would any fellows who could help themselves stay in a backwoods place like that? And I've no interest in the other sort, so Cousin Columbine needn't worry about those young men callers she mentioned. And you needn't either," Nancy told her mother with a smile.

"I s'pose you'll see Pike's Peak," observed the small boy thoughtfully. "It rises fourteen thousand feet above the plains, and was sighted by Zebulon Pike in November 1806 when with fifteen soldiers he climbed to the summit of Cheyenne Mountain and—"

"You see," broke in Jack, grinning, "that's the boy who ought to go to Harvard! Imagine me reciting whole pages out of history, Dad! Why in—"

He stopped abruptly, because the curtains at the door had parted and a maid announced: "Dinner is served, Mrs. Nelson. And," (she came forward, extending a silver tray on which was lying a yellow envelope), "here is another telegram for Mr. Jack."

## CHAPTER IV.

Jack took the telegram, staring at it for a surprised moment. Then Phil cried out impatiently: "Why don't you read it? I bet you anything that Cousin Woodbine has changed her mind."

"Woodbine!" Jack shouted, while even Dad forgot his worries in amusement at the little boy's mistake. "The lady's name is Columbine, you crazy kid, and," (tearing open the envelope), "she says: ADVISE BRINGING PLENTY OF RELAY UNDERWEAR AND FLANNEL NIGHTGOWNS FOR NANCY STOP NIGHTS AND EARLY MORNINGS APT TO BE COLD. COLUMBINE NELSON."

"It'd give a lot to see Nancy in a flannel nightgown," observed Phil dryly. "Mrs. Grant had one of the night I slept over at Tim's house, and she came in to give him some medicine. It made her look like an

## For Baby's Bath

More than that of any other member of the family, baby's tender, delicate skin needs the greatest care and attention. The soft, soothing oils in Baby's Own Soap make it specially suitable for babies, and its clinging fragrance reminds one of the roses of France which help to inspire it.

"It's best for you and Baby too" 27-28

old lady. I bet Nancy wouldn't be fond of being in one, or Mother either. Come on. Let's eat."

Dad was still smiling as they moved towards the dining room; but once seated, he looked across at Mother and his eyes clouded. Both were thinking that this would be the last well-served dinner in the old home. Two maids were leaving next day; and only the cook was to remain until the city house was closed.

Remembering this fact, Aunt Judy had stopped at a florist's on her way home, and a dozen jonquils nodded gaily from the centre of the table. Aunt Louise, eyeing them with disapproval, started to say something about "foolish extravagance," and then held her tongue. After all, she thought, with extraordinary tact, if Judy wanted to spend money for something perishable in these hard times, it was her own business.

So Judith Hale's "extravagance" (the last she was to indulge in for many months) remained uncondemned, adding a note of cheer to that dinner table, as she meant it to; yet as the moments passed Mother kept thinking sadly of how soon they would all be scattered—separated. She, Dad, and the little boy at Edgemere—Judith in Europe—Louise alone in a city boarding house—Jack and Nancy.

This last she refused to face just then, and said when Jack resumed the subject: "Oh, let's forget it, dear, while we eat dinner."

"But we've got to decide, Mother," he persisted with impatience. "I dare say Cousin Columbine's expecting a telegram to-night."

"Never mind," put in his father. "It won't hurt the old lady to wait for a message until tomorrow. But we'll decide the question this evening, Jack. I promise you. After all, it's as easy to face things now as later."

(To Be Continued)

## THE RHYMING OPTIMIST

By Aline Michaelis

## NOT TOO NEAR

Let me not be too near  
The lives I hold most dear,  
Least much detail obscure  
The plan, the purpose sure  
Which in their being flowers  
Through bright and sunless hours,  
May I, afar, discern  
The truths I long to learn,  
How clear my loved ones' eyes,  
How brave they are, how wise,  
How strong for sacrifice,  
The distance has its haze;  
But yet the closer gaze,  
Too fixed and too intent,  
Must lose the full extent  
Of all a life has meant.  
Too near, I could not seize  
On moods and mysteries,  
The soul's far boundaries.

## Change Of Headgear

Toronto chauffeurs must wear derbies from now on. Not satisfied with wearing derbies themselves, the board of control notified chauffeurs, who have been accustomed to wearing caps as the most serviceable form of headgear, in driving a car: "No more caps. Wear derby hats. There will be no exceptions."

Nine out of every ten heavy trucks in Germany are fitted with Diesel engines. 2101

## A Mobile Army

## Germany Plans For Swift Movement Of Troops

Authoritative sources disclosed in Berlin that the German military command plans a highly mobile infantry and artillery which will enable the army to move at 80 miles an hour "over almost anything except woods."

Two motor vehicles for every four infantrymen is the new army's ratio to obtain an unprecedented flexibility and speed.

Open automobiles carrying powerful guns will be used over most roads, sturdy trucks with a capacity of 20 men will be employed on congested highways and near the front, and tanks or armored cars are planned for front line service.

Light field pieces, splendidly highways strategically extending to the frontiers, commissariat equipment, motor vehicles, and tanks are included in the array of improvements that a foreign expert described as "leaving nothing, not even the weather, to chance or the luck of an enemy."

The underlying principle, he said, is that a future war will be a "fast" one, requiring rapid movement of men and arms to any number of fronts while swift aeroplanes swoop over an enemy city to destroy communities and morale, to keep rival planes away, and to conduct reconnaissance.

## Tragedy For The Drummer

## Sling Broke During Change Of Guards At Windsor Castle

Presumably it is safe to say that there are few who have not seen Bateman's cartoon of the Guardsman Who Dropped His Rifle.

He should draw a companion piece—The Drummer Who Dropped His Drum.

The other day they were changing the guard at Windsor Castle. It was, of course, when the King was in residence there, just before the Jubilee celebrations. The public—it is estimated there were 10,000 of them who turned out to see the grand sight—flocked to the ceremony.

With the splendid bearing for which they are noted the Grenadier Guards got under way. They were headed by their band. In the front rank of the drums marched the unfortunate victim of the tragedy.

The sling which carried his drum broke. The instrument banged and clattered along the ground, rolling along beside the marching men. Most mortifying!

It says much for the discipline of the standing army that not a man broke step, nor even looked toward the offending instrument. Not even the drummer—he just kept marching along.

A civilian picked up the drum and returned it.

## Has Place In History

## Plaque Unveiled At Base Of Mimosa Tree In Natal

In a quiet garden of a residence in Maritzburg, Natal, a company of distinguished people honored a flaccid mimosa tree, under the spreading branches of which General A. W. I. Pretorius, members of the Volksraad, and burghers of the Natal Republic decided on July 5, 1842, to accept British rule. The 1935 group unveiled a plaque at the base of the tree telling of its place in history.

From 38 to 108 hairs daily are shed normally by young men and women between the ages of 18 and 26; between the ages of 50 and 60, this number exceeds 120 hairs daily.

Father: "But if you marry my daughter, what will you live on?" Sutor (blandly): "Oh, she'll remain here as your housekeeper, and I'll become your secretary."

## 1000 PAIRS OF MONARCH DEBUTANTE SILK STOCKINGS Free!

Go to your druggist or department store and buy RIT dye (any color, 15c-1 for 25c). Use it. Then tell us in a statement of 50 words or less, why you prefer RIT—1,000 pairs of Monarch Debutante full-fashioned—shadow-free pure silk chifon stockings—latest Spring shades—guaranteed \$1.00 value—will be given as prizes to 1,000 entrants. There are dozens of reasons why you will prefer RIT. RIT comes in 13 basic brilliant colors, from which can be produced over 50 of the newest Pantone shades.

**FAST COLORS WITHOUT BOILING!** Only RIT offers this advantage! RIT is the modern dye or dye—easier and sure—far superior to ordinary "surface dyes" because it contains a patented ingredient that makes the color *set* in place, set faster and last longer. Sold everywhere.

## HOW TO WIN

1. Write a short statement (under 50 words) on why you prefer RIT Dye and send it together with an empty RIT package (or, reasonable facsimile) and your name and address, to John A. Huston Co. Ltd., 42 Caledonia Rd., Toronto.

2. Send as many as you wish; contest closes midnight June 29, 1935.

3. 1,000 prizes will be awarded on the decision of the judges, who will be fair. Whether you win a pair of silk stockings or not; we will mail to all entrants free of charge our famous booklet—"The A.B.C. of Home Rug Making."

## Little Helps For This Week

"If we hope for what we see not, then do we with patience wait for it." Romans 8:25.

"One day is with the Lord as a thousand years and a thousand years as one day." 2 Peter 3:8.

Lord, who Thy thousand years doth wait.  
To work the thousandth part  
Of Thy vast plan, for us create  
With zeal a patient heart.

—J. H. Newman.

I believe if we could only see beforehand what it is that our Heavenly Father means us to be, the soul, beauty and perfection and glory, the lovely spiritual body this soul is to live in through all eternity, if we could have a glimpse of this we should not grudge all the trouble and pains. He is taking with us now to bring us up to that ideal which is his thought of us. We know that it is God's way to work slowly, so we must not be surprised if He takes a great many years of discipline to turn a mortal being into an immortal glorious angel.

## Gandhi Again

## Mahatma Refuses To Sanction The Killing Of Rats

Mohandas K. Gandhi caused a sensation in a plague-infected territory of India by refusing to sanction "even the killing of a rat" as part of the anti-league measures by which natives were hoping to save human life.

Being an advocate of non-violence, the Mahatma said he would die before killing a single rat. He suggested strict observance of sanitation rules which would prevent rats breeding, and he advised adherents against killing them under any circumstances.

## Flight Of Model Plane

With a flight of nearly three miles while in the air four hours 23 minutes, the model plane of a school-boy at Krasnodar, USSR, is claimed to have established a world record. The average height reached by the model was 4,500 feet, but at times it rose to an altitude of over a mile.

## Men's Oxfords

Men's oxfords for the summer days. Smart new two-tone sport oxfords or the staple black. We have them and in your size. **2.69** Priced from

## BANKING IDEALS THAT LIVE ON

"The value of that enterprise (the Bank of Montreal) ought not to be measured by its success as a joint-stock undertaking, by the amount of its capital or the size of its dividends, but by the security it has given to those who have trusted it, the facilities it has furnished for the exchange and the increase of commodities, and the assistance it has contributed to the development of the country."

The Bank, now well on in the second century of its life, still wishes to be measured by the considerations mentioned in the foregoing quotation from "The Centenary of the Bank of Montreal," published in 1917.

Security, facilities, assistance—those have been the objectives of the Bank since its foundation in 1817. They are the objectives today and will be in the tomorrows of Canadian life.

## FARM INVENTORY IS GUIDE TO BUSINESS

By R. T. Burdick, Economics Dept., Colorado College of Agriculture

Can you give a complete list of all the machinery, live stock, supplies and property that you own?

A complete inventory of your property will prove a valuable aid in answering this question, and in helping to plan for needed repair or replacement of equipment.

All business men need to know the facts about their equipment and holdings, and farmers are no exception. Do you know how much feed of various kinds it takes to carry each class of live stock through the winter? If not, now is a good time to make some careful estimates. Find out just how much feed is on hand, and you can tell how much you will have to buy or may have for sale. You will have some valuable information to help you in planning ahead.

A complicated set of record books is not necessary for taking a farm inventory. The simplest form of pocket notebook is better than nothing. The inventory and other farm records and accounts can be kept in a book supplied by the college extension service. The important thing is to get the information written down, and a notebook then can be slipped in the pocket.

Farmers are urged to adopt the inventory habit and assemble information about the farm. It pays to study what you are doing, and it pays to plan ahead.
